Sources: Committee on Rules Tables for 103rd & 104th Congresses; House Calendars, and personal examination of texts of and reports on special rules reported by the House Rules Committee, from the THOMAS and Rules Committee web sites for 105th-114th Congresses. <

Notes: The table applies only to special rules providing for the initial consideration for amendment of bills, joint resolutions, and significant concurrent resolutions (e.g., budget, war-related). It does not apply to privileged resolutions considered in the House, to subsequent rules for the same measure, to conference reports, or to special rules that only waives points of order against appropriations bills but do not provide for consideration in the Committee of the Whole. Rules making in order more than one bill are counted as a separate rule for each measure made in order, e.g., a rule providing for the consideration of four bills under closed rules is counted as four closed rules. An open rule is one which permits any Member to offer an amendment otherwise germane in the Committee of the Whole under the five-minute rule. A modified open rule is one which either requires the pre-printing of amendments (PP) in the Congressional Record, sets an overall time-cap (TC) on the amendment process, or both. A structured rule is one which limits the amendments that can be offered to those specified in the special rule and/or report on the rule (and now includes previously designated modified closed rules that allowed just one amendment). A closed rule is one which permits the offering of no amendments (except those recommended by the reporting committee(s)). R & NR indicates whether the bill was reported or not reported. **(Compiled by Don Wolfensberger/Resident Scholar, Bipartisan Policy Center)**

Notes: A self-executing rule is a simple House resolution reported by the Rules Committee providing for the consideration of a bill or joint resolution that also provides for the adoption of an amendment to the bill or joint resolution upon adoption of the special rule (i.e., the specified amendment is automatically adopted before the bill is even taken up). For example, the special rule will often read, "The amendment in the nature of a substitute recommended by the Committee on __ now printed in the bill, modified by the amendment printed in Part A of the report of the Committee on Rules accompanying this resolution, shall be considered as adopted."

114th (2015-16)	9	20%	37	80%	46

Notes: A self-executing provision in a special rule is one which provides for the automatic adoption of additional language into the legislation upon the adoption of the rule. The total number of rules used for self-executing rules is sometimes greater than the total used for amendment type rules because it includes not only rules for initial consideration of bills and joint resolution, but for simple and concurrent resolution and for adopting Senate amendments to House bills.

Notes: Data extracted from special rule tables maintained by Don Wolfensberger, Bipartisan Policy Center, based on inspections of individual rules and committee reports and summaries on them. Structured rules include all those special rules reported by the Rules Committee that specify the amendments that can be offered (and include modified closed rules that only allow for one minority amendment). Open rules here include modified open rules that may impose a time cap on the amendment process and/or require pre-printing of amendments in the Congressional Record, but otherwise to no restrict or specify what amendments may be offered (so long as they otherwise comport with House rules). Beginning in the 112th Congress under the House Republican majority, certain amendments were designated as bipartisan by the Rules Committee as the request of their authors. **N.B.:** The above amendments do not include those offered under open rules in the 112th and 113th Congress (primarily on appropriations bills).
