Creating a Coordinated, Integrated Early Care and Education System: State Early Childhood Administration

In 2018, the Bipartisan Policy Center examined how states oversee federal and state funding dedicated to early childhood education, or ECE, programs. Now in 2021, we revisit each state system to understand enacted improvements and emerging challenges in state governance.

As the country adjusts to a new reality of work and home life amid the pandemic, American families are faced with the challenge of finding and affording quality child care, now more than ever. Early learning operates within a fragile business model, in which services cost more than most families can afford to pay. For this reason, states must administer funding with efficiency and effectiveness to ensure families are able to access programs and to maximize the reach of federal and state investments.

States are now responsible to distributing recent COVID-19 relief funding for child care—allocated through three successive relief packages by Congress in 2020—in addition to established funding streams that support multiple early childhood programs. The relief packages are intended to stabilize the fragile system that challenged access to affordable, reliable care. State governments are tasked with coordinating and combining the many different ECE funding streams allocated to them.

For all but one federal program, governors have wide discretion with regard to the administration and coordination of early childhood funding. The Bipartisan Policy Center set out to re-examine the issues of state governance, coordination, and integration by reviewing how states are meeting requirements set by federal statutes and agencies, as well as how states are capitalizing on the opportunity to create efficiency through their governance structures.

With this in mind, BPC is making recommendations at the federal and state level with an eye towards further reducing duplication and improving results for families. These recommendations are summarized in the full report. The following summarizes the findings for Indiana.

More state data, including funding levels and demographic information, can be found at <https://bipartisanpolicy.org/report/national-child-care/>.

STRENGTHS OF INDIANA'S EARLY CARE AND EDUCATION SYSTEM

- Indiana manages five programs serving children—Child Care and Development Fund (CCDF); Head Start Collaboration Office; state Pre-K; IDEA Part C; Temporary Assistance for Needy Families (TANF)—under one agency, which improves efficiency and allows for better alignment of eligibility and monitoring requirements and quality improvement activities.
- Indiana transfers 30 percent of TANF funds to CCDF, which ensures these funds comply with CCDF regulations.

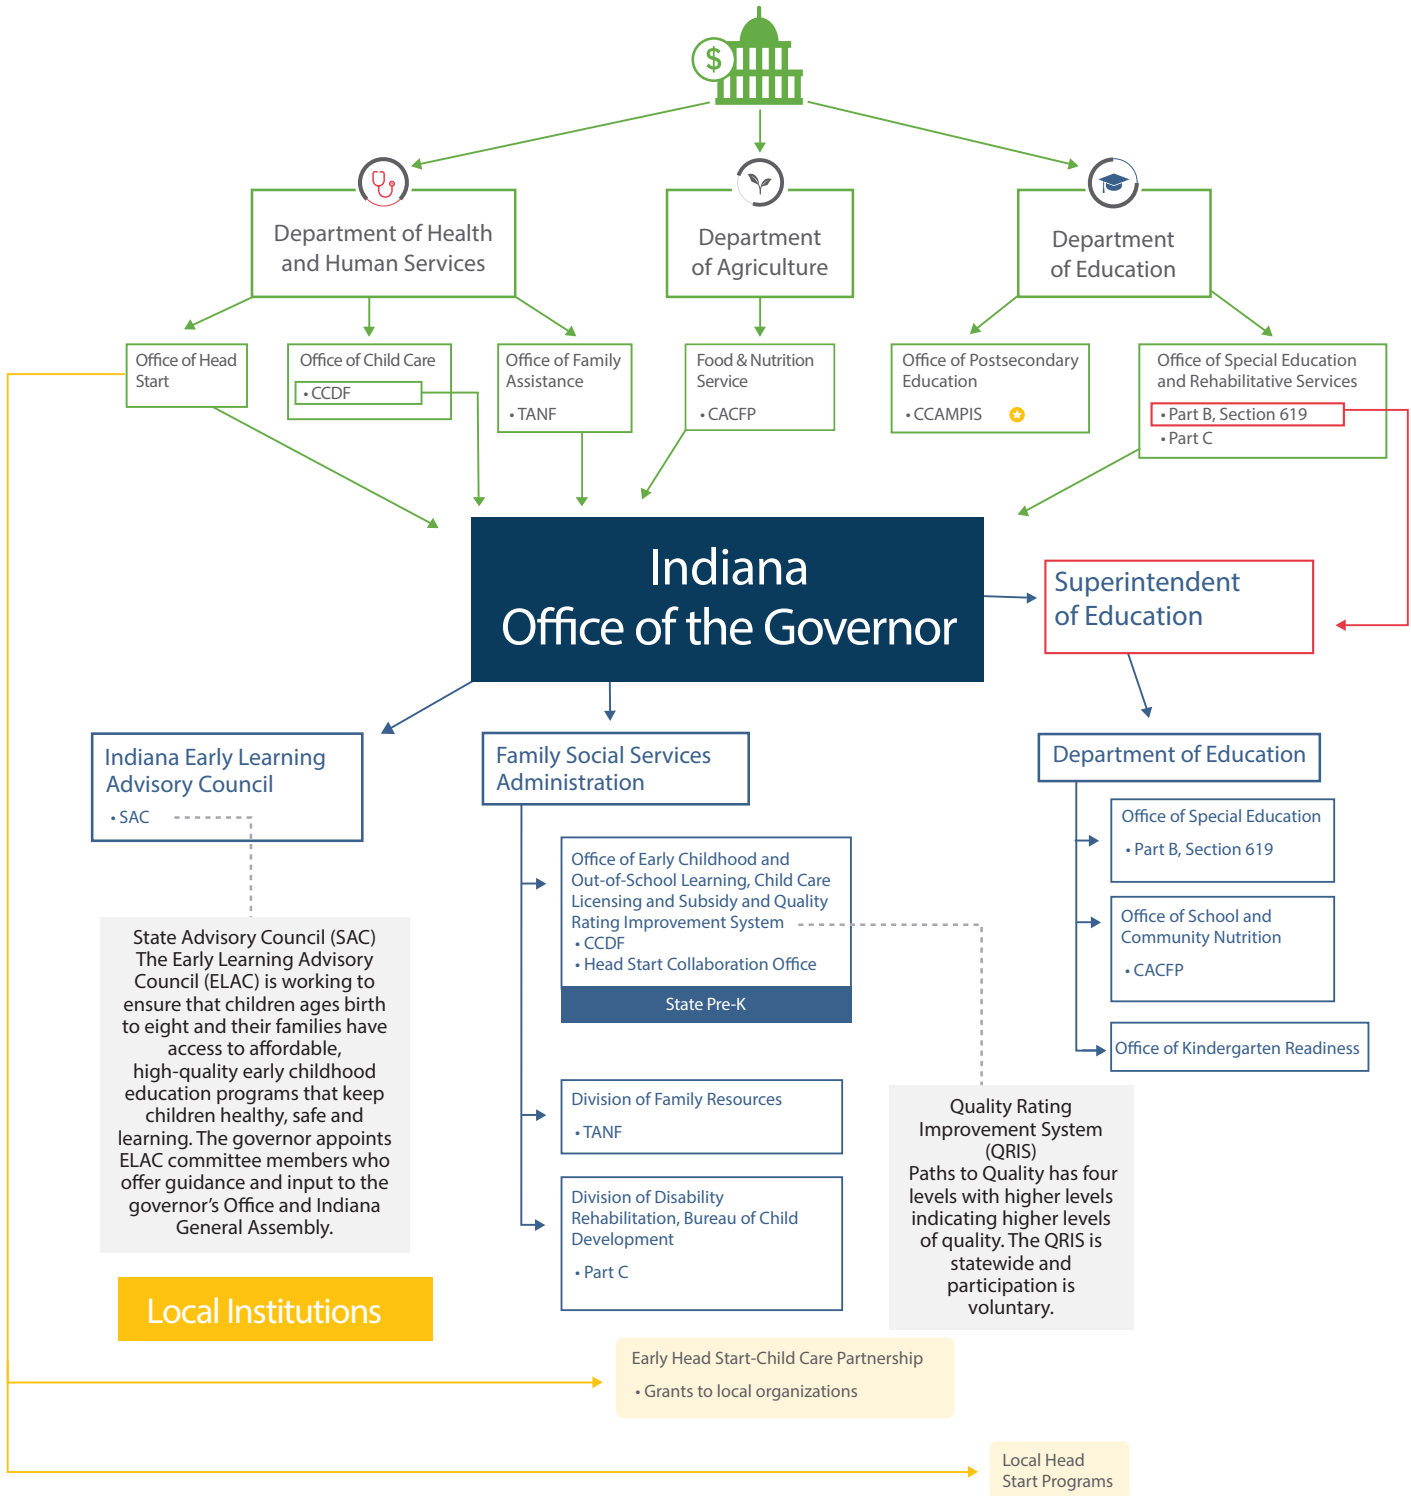

RECOMMENDATIONS FOR INDIANA'S EARLY CARE AND EDUCATION SYSTEM

- Facilitate cross-agency communication to ensure seamless coordination and transition for IDEA Part C (infants/toddlers) and Part B, Section 619 (3-5 year olds).
- Ensure the State Advisory Council for Early Education and Care, mandated by the Improving Head Start for School Readiness Act of 2007, is fulfilling its required activities, including conducting a statewide needs assessment on the quality and availability of early care and learning programs.
- Include licensing as the entry level for state Quality Rating and Improvement System to ensure program quality.
