Sources: CQ A/manacs, 1981-2000; CQ Weekly, 1999-2013. Data for each Congress is derived by adding annual party unity votes compiled by CQ. Average House Member party support scores are derived by averaging the annual average member scores for the two years of each Congress. Member party support percentages are derived from the number of times a member sides with his party on party unity votes.

Sources: "Resume of Congressional Activity," Daily Digest, Congressional Record; "Survey of Activities," Committee on Rules; Congressional Research Service Reports on
"Committee Numbers, Sizes, Assignments and Staff," and "Legislative Branch Appropriations;" House Calendars; Rules Committee Calendars \& Website; and THOMAS. Notes: "Public measures" refers only to bills and joint resolutions and not simple or concurrent resolutions; "all measures" includes bills, joint, concurrent and simple resolutions. Suspension measures are those relatively non-controversial bills and joint resolutions considered under the suspension of the rules procedure on Mondays ,Tuesdays and Wednesdays which allows for just 40-minutes of debate, no amendments, and requires a two-thirds vote for passage.
