Opioid death rates are the opioid-involved death rates found from CDC Wonder database. Drug-poisoning (overdose) deaths are identified using underlying cause-of-death codes X40–X44, X60–X64, X85, and Y10–Y14. Among deaths with drug poisoning as the underlying cause, opioid-involved multiple cause-of-death codes include: T40.0–T40.4 and T40.6.
