THE SUPPLY OF, POTENTIAL NEED FOR, AND GAPS IN CHILD CARE IN WASHINGTON IN 2019

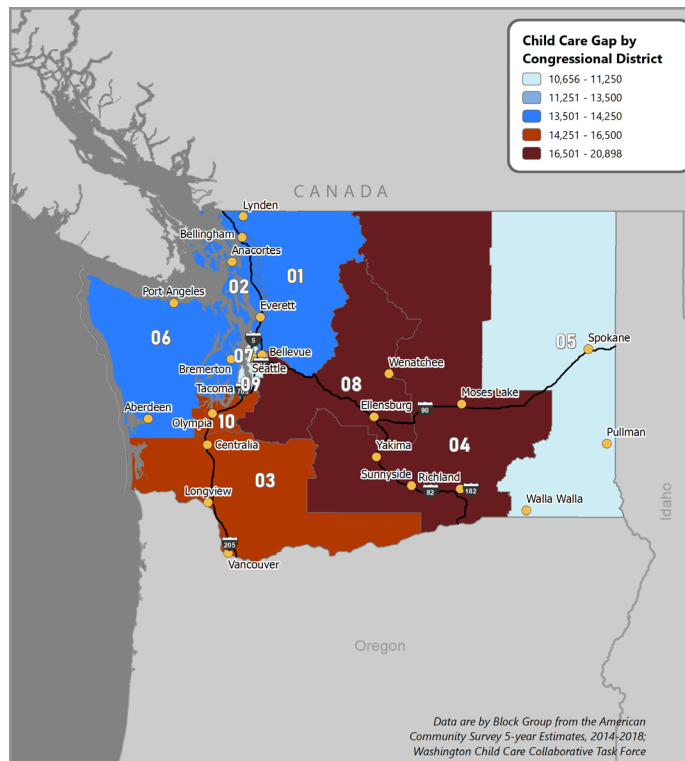

In recent years, there has been increasing bipartisan support at all levels of government to ensure working parents have access to high-quality, affordable child care. But amid these efforts, an important underlying question has yet to be answered: **how much additional child care does the country need?**

Without a clear understanding of the actual supply versus the need for care—the child care gap—it is impossible to quantify either the actual child care spaces needed or the corresponding costs associated with closing that gap. Without this information, America is unable to develop a plan to ensure that all families have access to affordable, reliable, and quality care for their children.

Incorporating the most comprehensive child care supply data collected from **Washington** to date, and an advanced methodology incorporating parent choice, this analysis provides a long overdue starting point from which the country can understand how much child care is needed. With such data, policymakers can produce evidence-based strategies to improve the supply of child care in a manner that reflects the quantity and type of child care communities actually need.

## UNDERSTANDING PARENT CHOICE

As policymakers review this data and consider how and where to address child care gaps in their communities, it is especially important to consider parent choices and preferences. While this data can be used to calculate the amount of child care needed, the *potential need* for child care should not be construed with the *actual demand* for care. These findings offer a starting point from which **Washington** can work to close its child care gaps, but more work needs to be done to both understand parent preferences and incorporate them into policy decisions at the federal, state, and local levels.

<b>Supply</b>	Number of slots offered by legally operated and state-recognized providers
<b>Potential Need</b>	Number of children aged birth through five with all available parents in the labor force
<b>Gap</b>	Number of children who potentially need care but whose families cannot reasonably access formal child care

### Percent Gap by Congressional District

# WASHINGTON

## Washington Child Care Gap Findings

Potential Need <sup>1</sup>	314,270 children
Supply <sup>2</sup>	173,160 slots
Gap	142,710 children
Percent Gap	45.4% of children

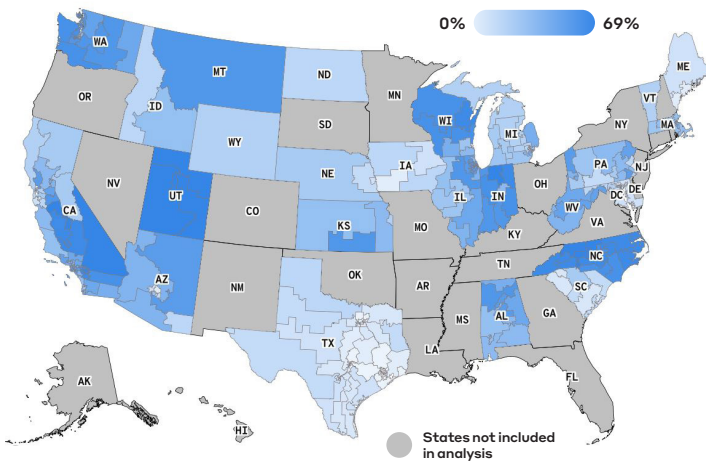

## Child Care Supply Across Washington

Facility Type	Count	Capacity
Center	1,734	125,810
Child Care Center Including Campus Child Care	1	10
College/University - not child care	3	190
Faith-Based Facility	6	250
Family Child Care Home	5	26
Head Start	114	4,860
Home	3,119	31,290
Local Government building	1	36
Non-Profit Organization Building	6	260
Other	1	130
Public school or school district building	132	5,010
School	80	2,670
Tribal Organization building	1	20
Additional from Office of Head Start	23	1,210
Additional from Department of Defense	4	1,390

## NATIONAL COMPARISONS

BPC performed a child care gap analysis in 25 states. **Washington's** statewide gap of **45.4%** is **higher** than the 25-state average. Rural communities in **Washington** are **more underserved** than urban communities—**consistent** with trends across the 25-states.

### Percent Gap by District

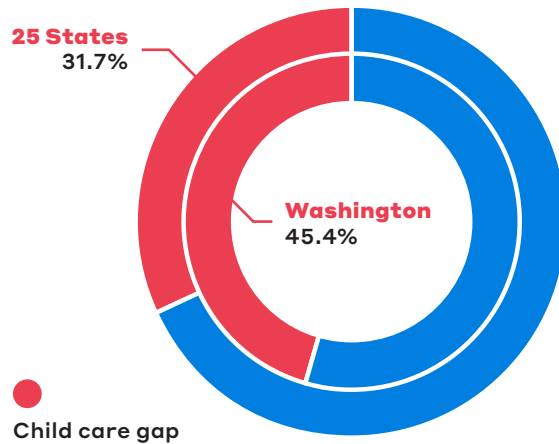

**8,449,000 children**  
have the potential need for child care.

There is a supply  
of **5,901,320**  
child care slots.

Child care gap:  
**31.7%** of the  
potential need.

### Washington vs. National Percent Gap

### Urban vs. Rural Gap
